

Genesis

With the Government of India actively supporting nutrition-based interventions, has made the role of all the nutrition stakeholders very crucial. Their areas of work cover a range of themes. However, the nutrition community was working in silos. Key nutrition partners identified the gap and conceptualised C2IQ- Coverage, Continuity, Intensity and Quality Partners Forum to address this gap. WeCan¹ in association with core partners, namely, Alive & Thrive (A&T), Coalition for Nutrition Security (CFNS) and UNICEF has been facilitating these convenings across various states; state specific partners and concerned government departments.

While the partner collaborations have been facilitated through C2IQ forum, in today's digital world it is imperative to connect all nutrition stakeholders on a virtual platform for the ease of access. With this rationale, WeCan has taken the collaboration to the next level by launching an online Nutrition Platform for partners, stakeholders, and funding agencies. It is an endeavour to bring all the nutrition partners together on an online platform to accelerate the pace of achieving the targets of POSHAN Abhiyaan.

The Platform

It is an interactive digital platform to map all the nutrition partners working in India, across thematic and geographic areas. It helps all the stakeholders involved – implementing organisations, government, funders etc – to stay up to date on all the happenings in the nutrition universe.

POSHAN Stockroom: The platform entails a POSHAN Stockroom, a **knowledge repository** with all the literature, reports, documents and publications related to nutrition developed nationally as well as globally. **It is a knowledge hub where partners can upload** their interventions, learnings, events, training modules, reports, case studies, and any relevant publications they want to share with a larger audience.

The repository is classified in different themes around child, adolescent, pregnant women and maternal nutrition.

How can you use the POSHAN stockroom?

The stockroom can be used to do preliminary research before starting any new intervention and help organisations focus on their functional expertise and collaborate with others for the expertise they have.

¹WeCan is a national level platform that brings together nutrition stakeholders to streamline their efforts and align them with POSHAN Abhiyaan goals. And acts as a facilitators for partner collaboration for nutrition, break the individual chambers they work in and help avoid duplication of efforts.

How to access the Partner Database?

It requires an easy registration process on the platform to access all the information about partner organization.

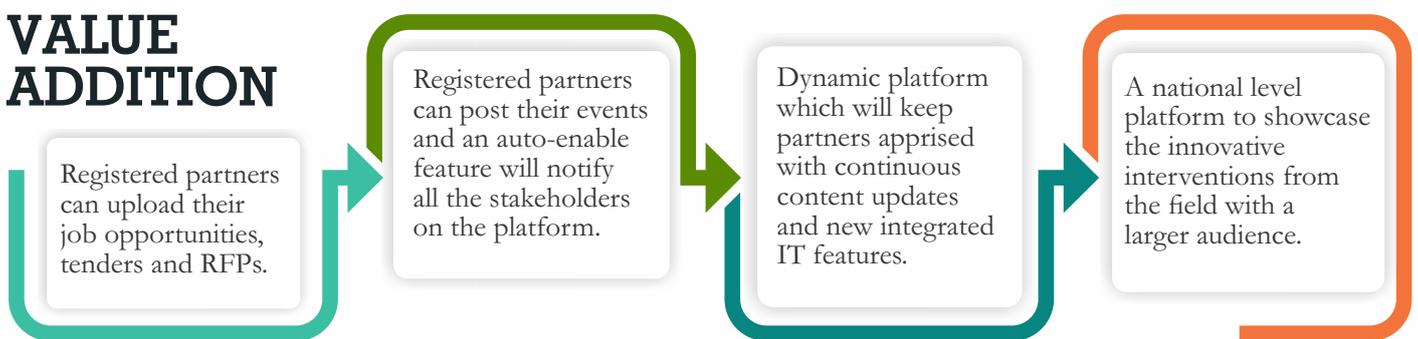

Partner Database: It provides an expansive database of all the nutrition partners across the country based on their geographical presence and their functional expertise.

Nutrition Radar

A dashboard developed by CTARA-Indian Institute of Technology Bombay showcasing the normalized performance of NFHS-4 indicators that directly or indirectly impact or indicate the status of maternal and child health and nutrition at state and district level with respect to best and worst performance of parameters within each domain.

VALUE ADDITION

Why the Nutrition Platform?

Stakeholders to avoid the duplication and reduce redundancy

Funders/Donors to make informed decision

Government Departments to analyse the best practices that can be scaled up

Partner Organization to share knowledge
